

# HitchHiker

## Hitchhiker

The Hitchhiker, developed by ACF Environmental to help simplify the removal of storm inlet grates.

### ***Problem:***

Inlet grates are heavy and difficult to remove for standard maintenance on stormwater inlet structures. Most inlet grates require extensive labor and equipment costs to maintain.

### ***Solution:***

The Hitchhiker is a one-man operation that simplifies storm inlet maintenance. It simply fits into a vehicle hitch receptacle. The Hitchhiker makes removing and replacing the storm inlet grate fast, safe and cost-effective.

### **Installation Instructions:**

- Remove unit from box
- Assemble the jack unit
- Attach the receiving unit to the bottom of the jack
- Attach extension to the receiving portion of the hitch on the vehicle
- Attach Hitchhiker to extension
- Attach hooks through grate at even intervals
- Lift with Hitchhiker
