

CASE STUDY

COUNCIL FIRE COUNTRY CLUB CHATTANOOGA, TN

GOLF COURSE - POND SHORELINE RESTORATION

PROJECT SUMMARY

Beautiful ponds within the Council Fire Country Club have been plagued by erosion of shorelines by draw down from irrigation and wind generated waves. Erosion along some pond shorelines has been significant enough to hinder maintenance, and become hazardous to golfers and adjacent property owners. Routine maintenance required by the Club has not been sufficient enough to prevent deterioration of the pond from erosion. The ARMORMAX® 75 System from Propex® GeoSolutions TEEtoGREEN® was installed in October 2016 as a permanent, natural appearance slope stabilization solution that satisfied the maintenance team, club members, and surrounding homeowners.

PROBLEM Substantial deterioration of pond shoreline from erosion

SOLUTION ARMORMAX® 75 by Propex TEEtoGREEN™

INSTALLATION Rapid, low-impact installation of permanent solution

PERFORMANCE Gently sloped, maintenance shoreline from erosion

FEATURES & BENEFITS

- Engineered Bank Slope Stabilization
- Easy and Rapid Installation
- Green, Naturally Vegetated Solution
- Cost-Effective Over Traditional Hard Armoring Solutions
- Proven Technology
- Sustainable Results
